

100% Natural & Fresh Cow Dung

We don't take care of cows
Cow take care of us

Cow dung is valuable source of
micro nutrients including
iron, sulfur ,aluminum, sodium,
copper, cobalt & manganese

Why Desi Cow is important in Natural Farming?

- ◆ One gram of Desi cow dung contains 300-500 crores of different useful microbes to help soil fertility.
- ◆ The bacteria in the fresh cow dung kills the malarial and tuberculosis microbes.
- ◆ The cow dung absorbs atomic radiations and emissions.

Cow urine contains :

1. Iron
2. Calcium
3. Copper
4. Phosphorus
5. Carboic Acid
6. Potash
7. Lactase
8. 24 types of essential salts

We guarantee the supply of 100% organic, fresh cow dung, directly sourced from our indigenous Indian COWS.

✓ **Key Features & Benefits:**

- Eco-friendly & natural soil nourishment agent
- Enhances microbial activity and boosts the population of beneficial soil bacteria
- Acts as a natural raw material for methane gas production (biogas)
- The leftover cow dung slurry post-methane extraction serves as an excellent bio-fertilizer
- High water-holding capacity helps plants survive in dry & hot climates
- Can be used as a natural UV absorption coating for walls & surfaces

👉 **Why Our Cow Dung Is 100% Organic:**

Our cows freely graze in the open forests of India. They are never fed artificial foods or treated with chemical dewormers, ensuring pure and chemical-free cow dung.

Natural Cow Dung Manure

Revitalize your soil naturally with 100% natural cow dung fertilizer.

To nourish the soil and increase its **organic carbon content**, it is essential to use **pure organic cow dung fertilizer**.

Overuse of chemical fertilizers, pesticides, and repeated cultivation depletes the soil's organic matter. This leads to reduced productivity and soil fatigue.

Packaging Deatils :

- 10 kg, 25 kg & 50 kg bags
-  Moisture-resistant HDPE material
-  Private labeling available

Why Choose Cow Dung Manure?

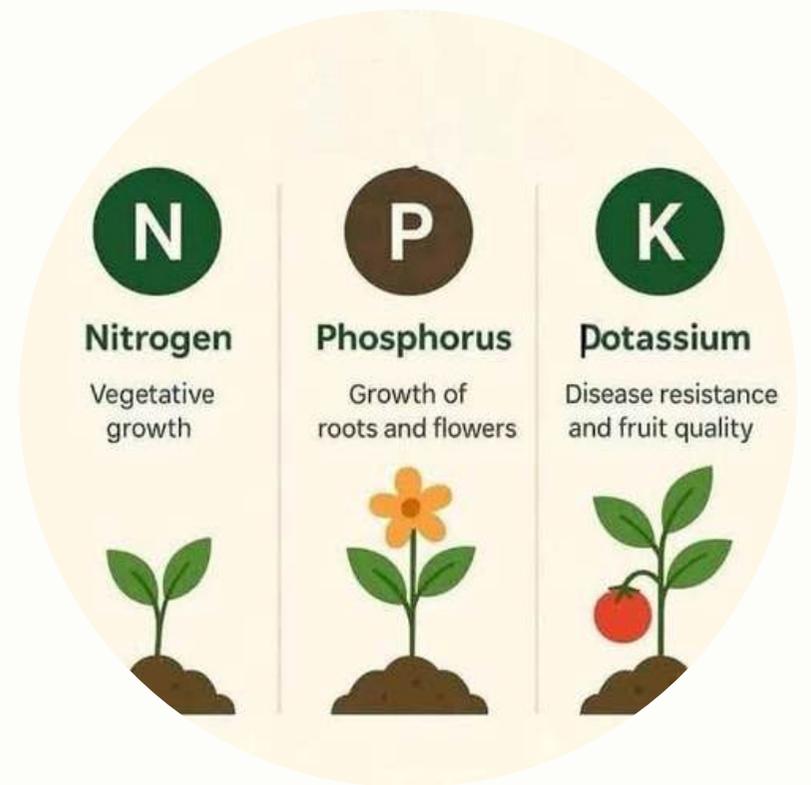

✓ Key Features & Benefits:

- Rich in **organic carbon**, which directly contributes to increased **crop yield**
- Improves **soil structure** and promotes the development of **white roots**, enhancing the plant's ability to absorb micronutrients and minerals
- Increases **humus content**, ensuring long-term soil fertility
- Enhances **soil aeration** and **water retention capacity**, preventing plant stress during dry or hot conditions
- Naturally contains a balanced mix of **micronutrients**, making them readily available for plant uptake
- Supports the growth of **strong, healthy and disease-resistant plants**

This ancient Indian farming technique, used for **thousands of years**, is nature's way of **nurturing the land without chemicals**.

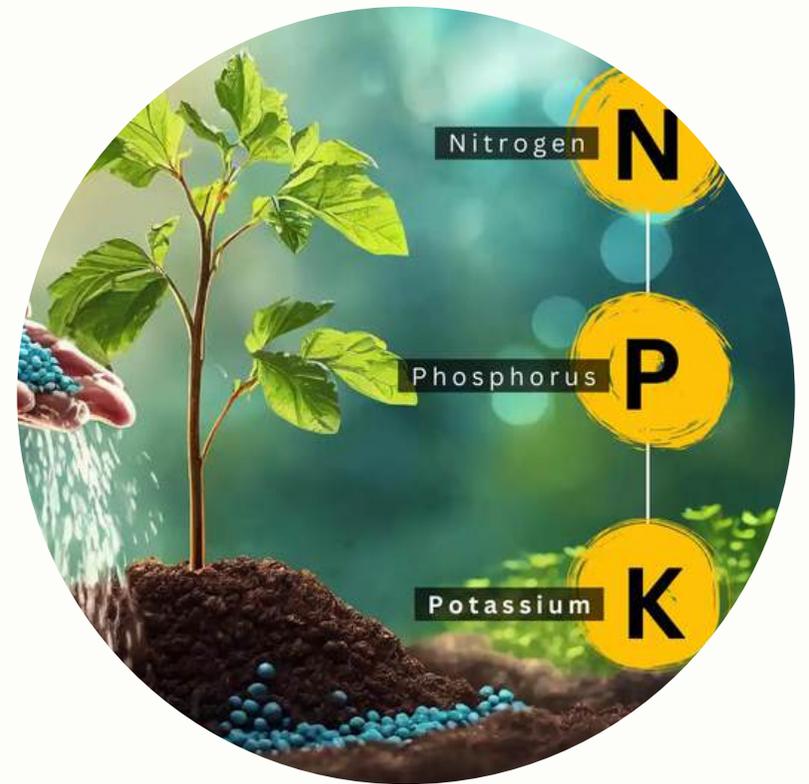

Natural Cow Dung Manure Enriched with Natural NPK

A powerful blend of **natural cow dung and naturally sourced NPK bacteria** to boost soil health and plant growth—without chemicals.

To meet modern farming needs while staying true to organic practices, we've enhanced our cow dung fertilizer by treating it with **naturally occurring NPK (Nitrogen, Phosphorus, Potassium) bacteria**. This improves the nutrient profile and accelerates results, naturally.

Why Choose Cow Dung Manure Enriched with Natural NPK ?

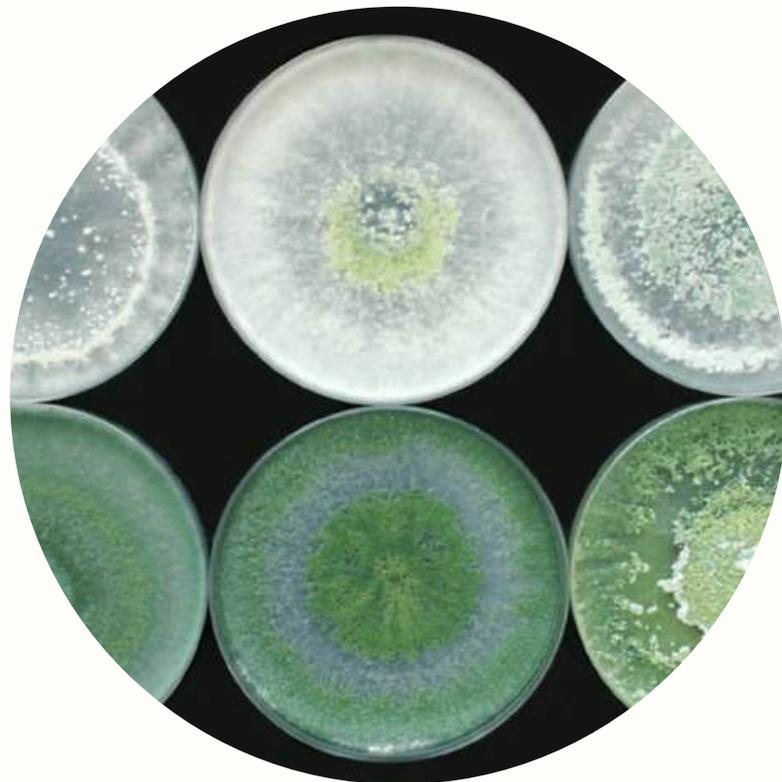

✓ Key Features & Benefits:

- Contains **natural NPK in plant-available form**, ensuring faster and more efficient absorption by roots
- 100% chemical-free — leaves **no harmful residue** or toxicity in soil
- Unlike chemical NPK, which causes soil hardness, salinity, and weakens water retention, our organic NPK **revitalizes the soil structure**
- Improves **soil porosity**, making it **soft, spongy and aerated**
- Enhances **water absorption capacity** and **maintains optimal soil pH levels**

This is a safe, sustainable alternative to chemical fertilizers—perfect for farmers who want high yields without harming the land.

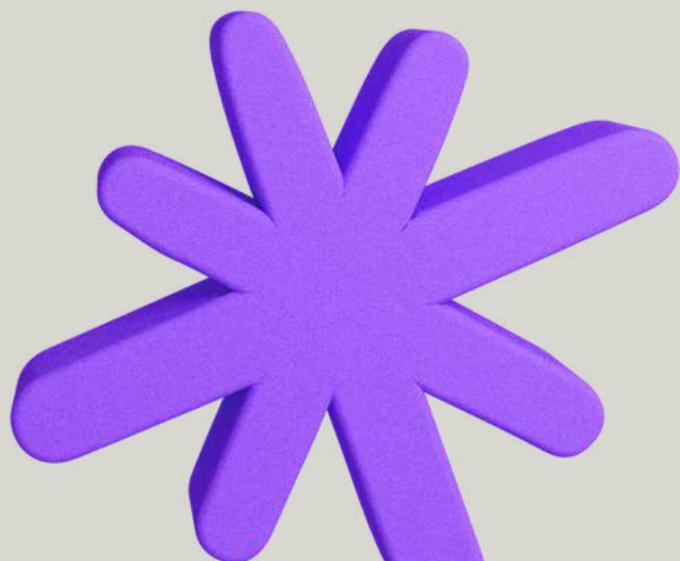

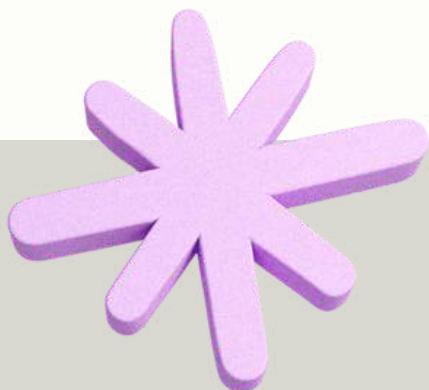

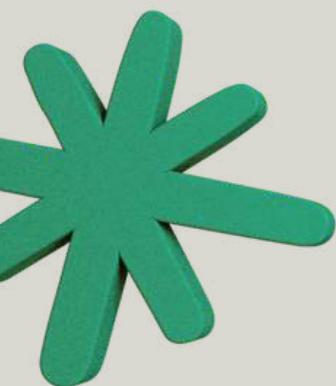

Natural Manure with Natural Fungicidal Protection

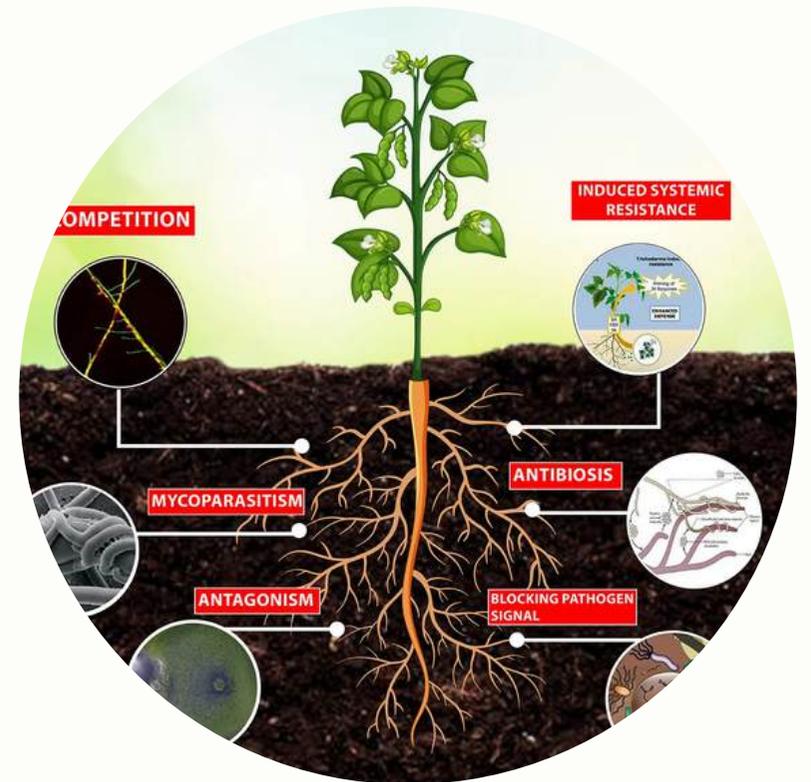

Protect your crops naturally while enriching the soil—no chemicals, no compromise.

In humid climates or under water stress, **harmful fungi** often develop in the soil, affecting plant health. To control this, chemical fungicides are commonly used. However, these also destroy **beneficial fungi and microbes**, weakening the plant's natural defenses.

To solve this, we have enriched our **natural cow dung fertilizer** with **Trichoderma viride**—a naturally occurring, beneficial fungus known for its **biological control** properties.

Why Choose Natural Manure with Natural Fungicidal Protection ?

✓ Key Features & Benefits:

- **Trichoderma viride** effectively suppresses harmful fungal pathogens in the soil
- Promotes the growth of **beneficial microbes** that support plant immunity and nutrient absorption
- Once applied, Trichoderma continues to **multiply and thrive in the soil**, offering **long-lasting protection**
- Enhances overall **soil health and plant resistance** without the need for chemical fungicides
- Safe for soil ecology, **preserves good bacteria and fungi** essential for sustainable farming

This is a smart, natural, and eco-friendly solution to maintain healthy crops and soil—**organically**.

 **100% Natural
Cow Dung Cake
(Dry Form)**

Nature's Traditional Fuel & Soil Booster.

Our Organic Cow Dung Cakes are **sun-dried**, hand-molded from fresh cow dung collected from indigenous cows that graze freely in natural pastures.

Free from chemicals and artificial additives, they are eco-friendly, smoke-light and multipurpose in daily use.

Why Choose Natural cow dung cake ?

✓ Key Features & Benefits:

- 100% organic & biodegradable
- Traditional Indian eco-fuel
- Long-lasting burn with minimal ash
- Naturally antiseptic & pest-repellent
- Ideal for rituals, cooking, gardening, and composting

✓ Applications:

- Religious & Spiritual Use: Havan, Yagna & Puja
- Cooking Fuel: For chulhas, tandoor & open-fire kitchens
- Organic Farming: Compost activator & soil enhancer
- Insect Repellent: Smoke keeps pests & mosquitoes away
- Natural Fertilizer: Increases soil microbial activity and humus content

This traditional product has been used for **centuries** in Indian households and agriculture due to its **sacred, sustainable and multipurpose qualities**.
